FIT FOR THE ACTIVE LIFESTYLE FOR ADULTS
The need for enteral feeding can be emotionally complex and limit patients’ lifestyle choices. Traditional feeding tubes may be difficult to conceal, visible through clothing and pose increased risk of snagging and removal – all of which can make patients limit their activities.

A physician prescribing a MIC-KEY* G Feeding Tube can make the transition to enteral feeding easier.

MIC-KEY* G Feeding Tube for Adults sits at skin level to help give your patients more freedom and mobility.

64% of enteral feeding patients are adults

REAL LIFE. REAL ISSUES.

A physician prescribing a MIC-KEY* G Feeding Tube can make the transition to enteral feeding easier.

MIC-KEY* G Feeding Tube for Adults sits at skin level to help give your patients more freedom and mobility.
SHOW THEM THE “NO-SHOW DIFFERENCE.”

MIC-KEY® G Feeding Tube for Adults

• Sits at skin level
• Easy to conceal
• Limited interference with clothing
• Various sizes for adults
• Enables patients to enjoy life to the fullest

VERSUS TRADITIONAL FEEDING TUBE

• Longer tubes may limit mobility
• More difficult to conceal, often secured with unappealing medical tape
• Outline may be visible through clothing
• May disrupt daily activities
• May pose increased risk of accidental tube removal

Real Life. Active Solutions.

Encourage personal freedom. Recommend MIC-KEY® G Feeding Tubes for Adults.

“The MIC-KEY® was huge in terms of improving the quality of my life. It’s about freedom and mobility.”

Rick D., 50+ year-old avid hiker and surfer.

“I feel more comfortable and less self-conscious.”

Betty G., 38-year-old dance teacher.
